[PIERS, JETTIES AND RELATED STRUCTURES EXPOSED TO WAVES ...

There are essentially three types of water wave induced uplift pressures on horizontal decks/platforms in both deep water (offshore oil production platforms) and shallow water (jetties, piers etc). At the instant of contact between the wave crest and the soffit of the deck, an impact pressure is exerted which is extremely large in magnitude and ...

(PDF) Wave-in-deck loads on exposed jetties

Where possible, jetties are constructed in sheltered locations or protected by breakwaters. The increase in vessel sizes in recent years and the need for deeper berths, in particular in the LNG/LPG industry, has meant that jetties are constructed in deep water and, as a result, in exposed locations, often extending several kilometres offshore.
